

Is your apartment's electricity bill too high?

Rooftop solar with no upfront installation cost to the society.

Bright Roof installs, owns, operates, and maintains rooftop solar systems for apartment societies in Hyderabad.

Your society pays only for solar electricity under the agreement, with a starting proposal of 10% saving against the agreed electricity-tariff benchmark.

Good fit for apartments with

- Lifts
- Water pumps
- Common lighting
- Clubhouse
- STP
- Security loads

Simple first step

Share 12 months of common-area electricity bills and allow a rooftop/electrical-room survey. Bright Roof will check whether solar makes sense for your society.
